Art Unit: 3682

Applicant's election of Group I in the reply filed on March 17, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 10-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: there is no support in the specification for the subject matter of claims 8 and 9.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Laue.

The patentability of a product claim is determined by the structure of the product, not the process limitations. Laue discloses a housing 12 comprising a shaft portion 26 including a groove profile 28, a hollow section 17 including an end area with a recess 19, the shaft projection being inserted into the recess and pressed together with the end area.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Nishikawa.

Note the circle segment-like pattern 25 extending in the range claimed.
